

QUADPOD

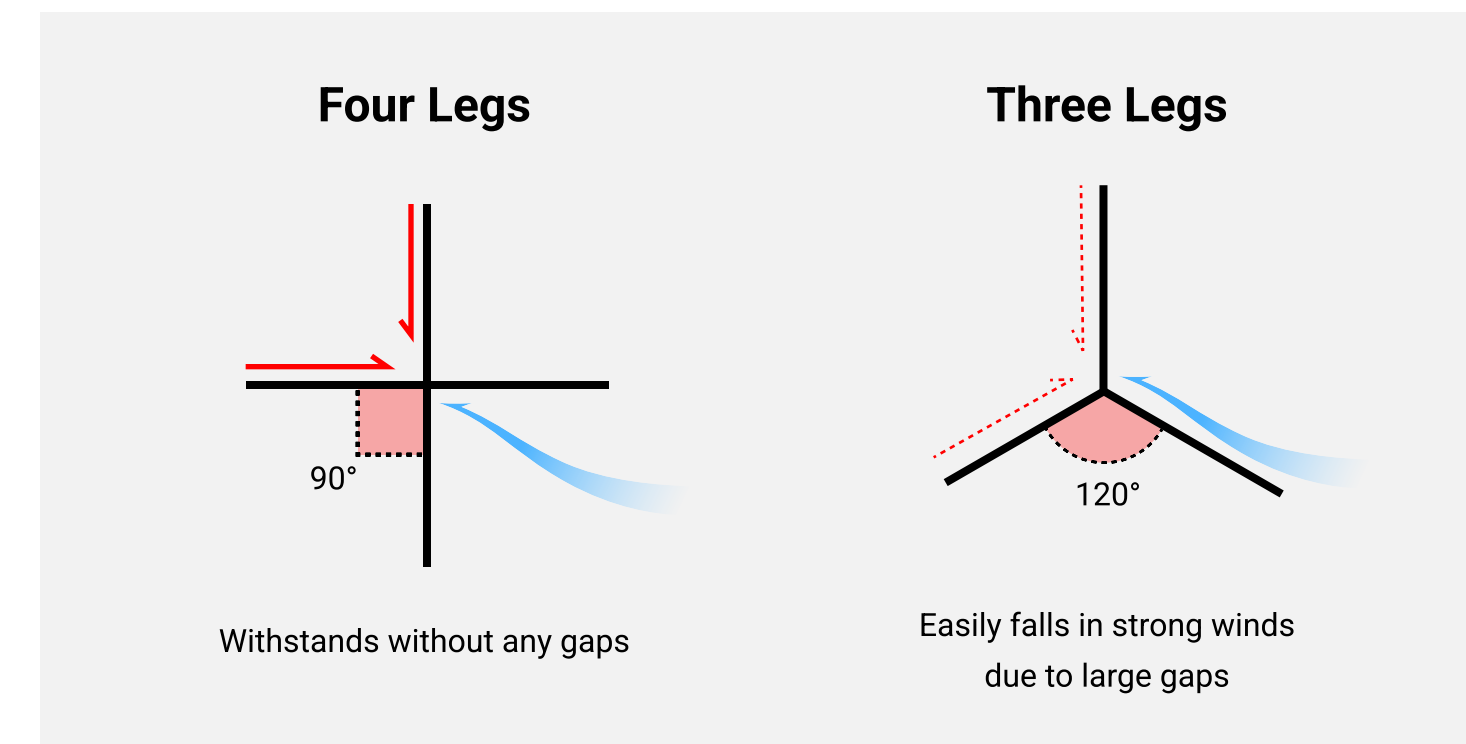

Introducing the world's first four-legged high stand

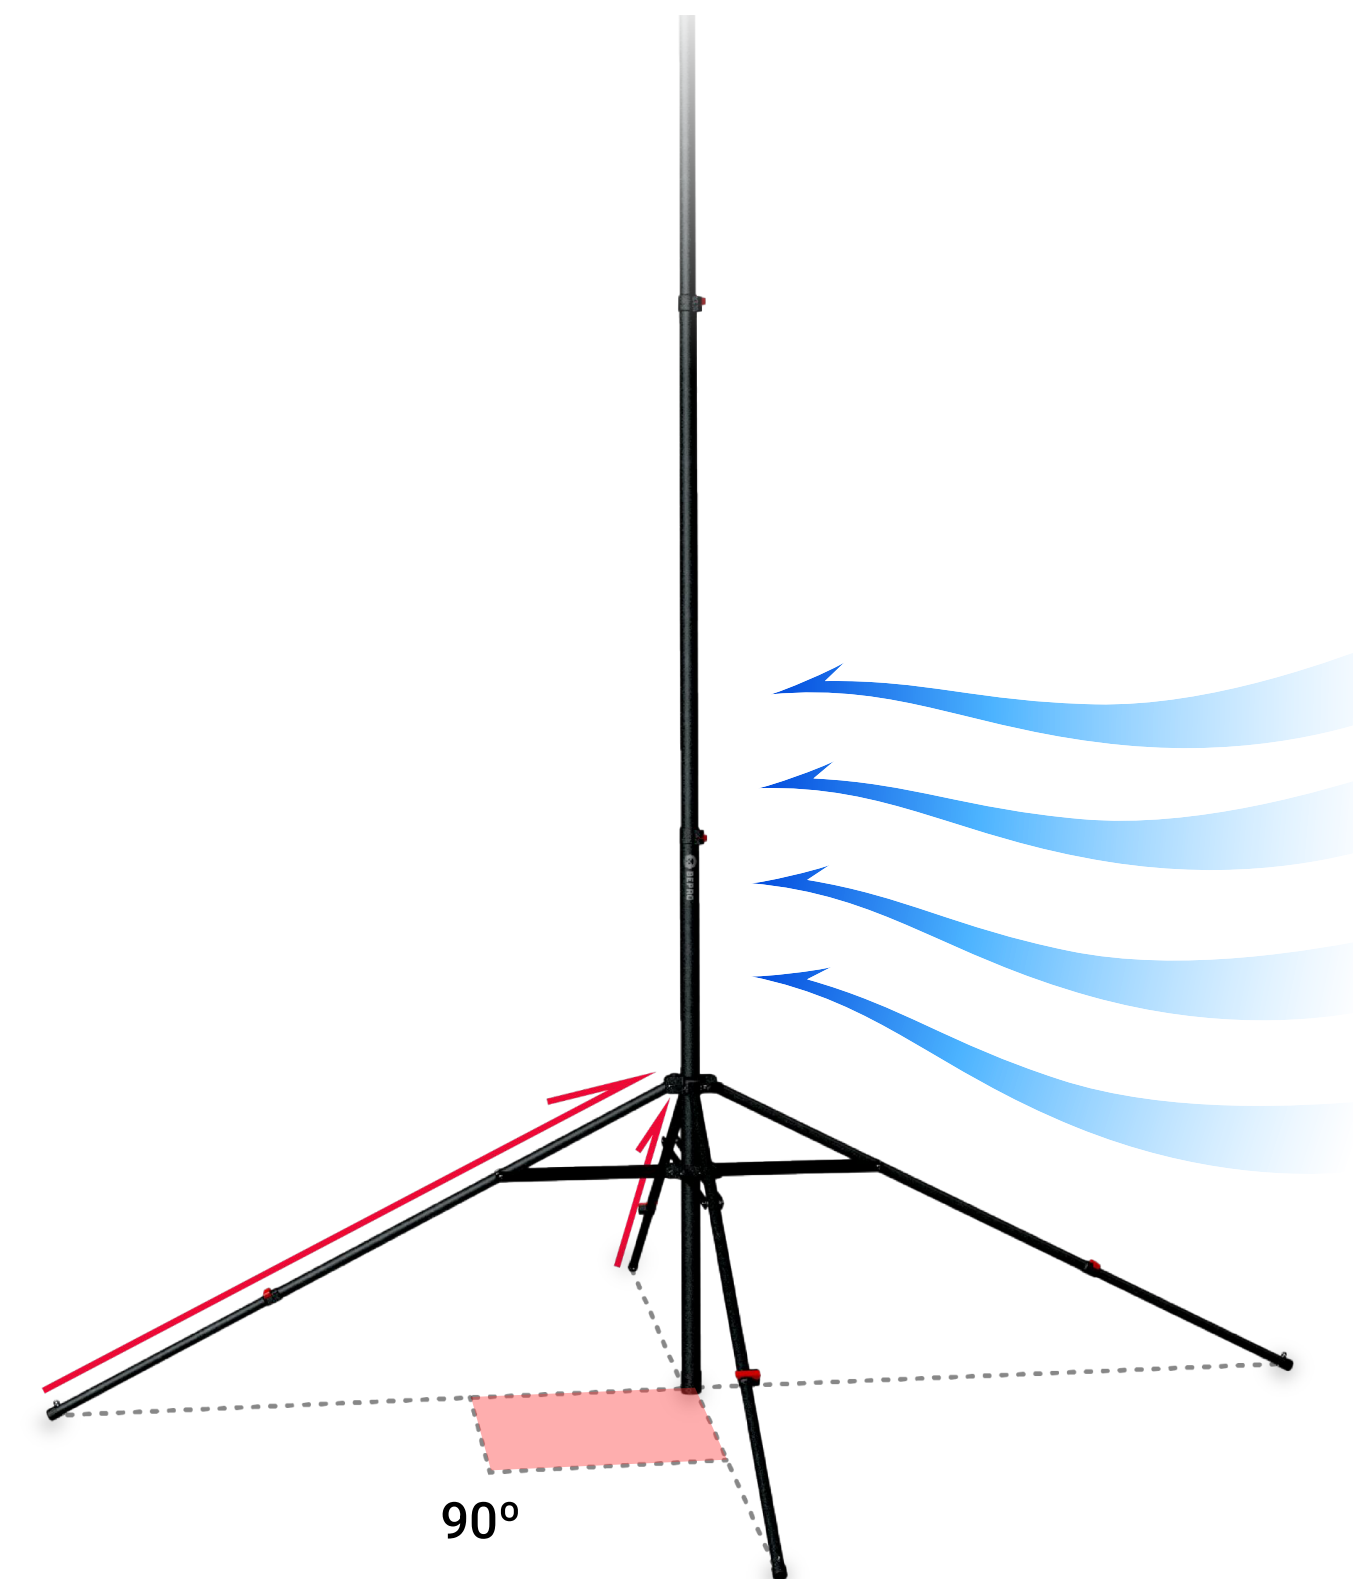

Why Four Legs?

Traditional camera stands with three legs have an inherent weakness at the angle between the legs, making them prone to tipping over when losing balance.

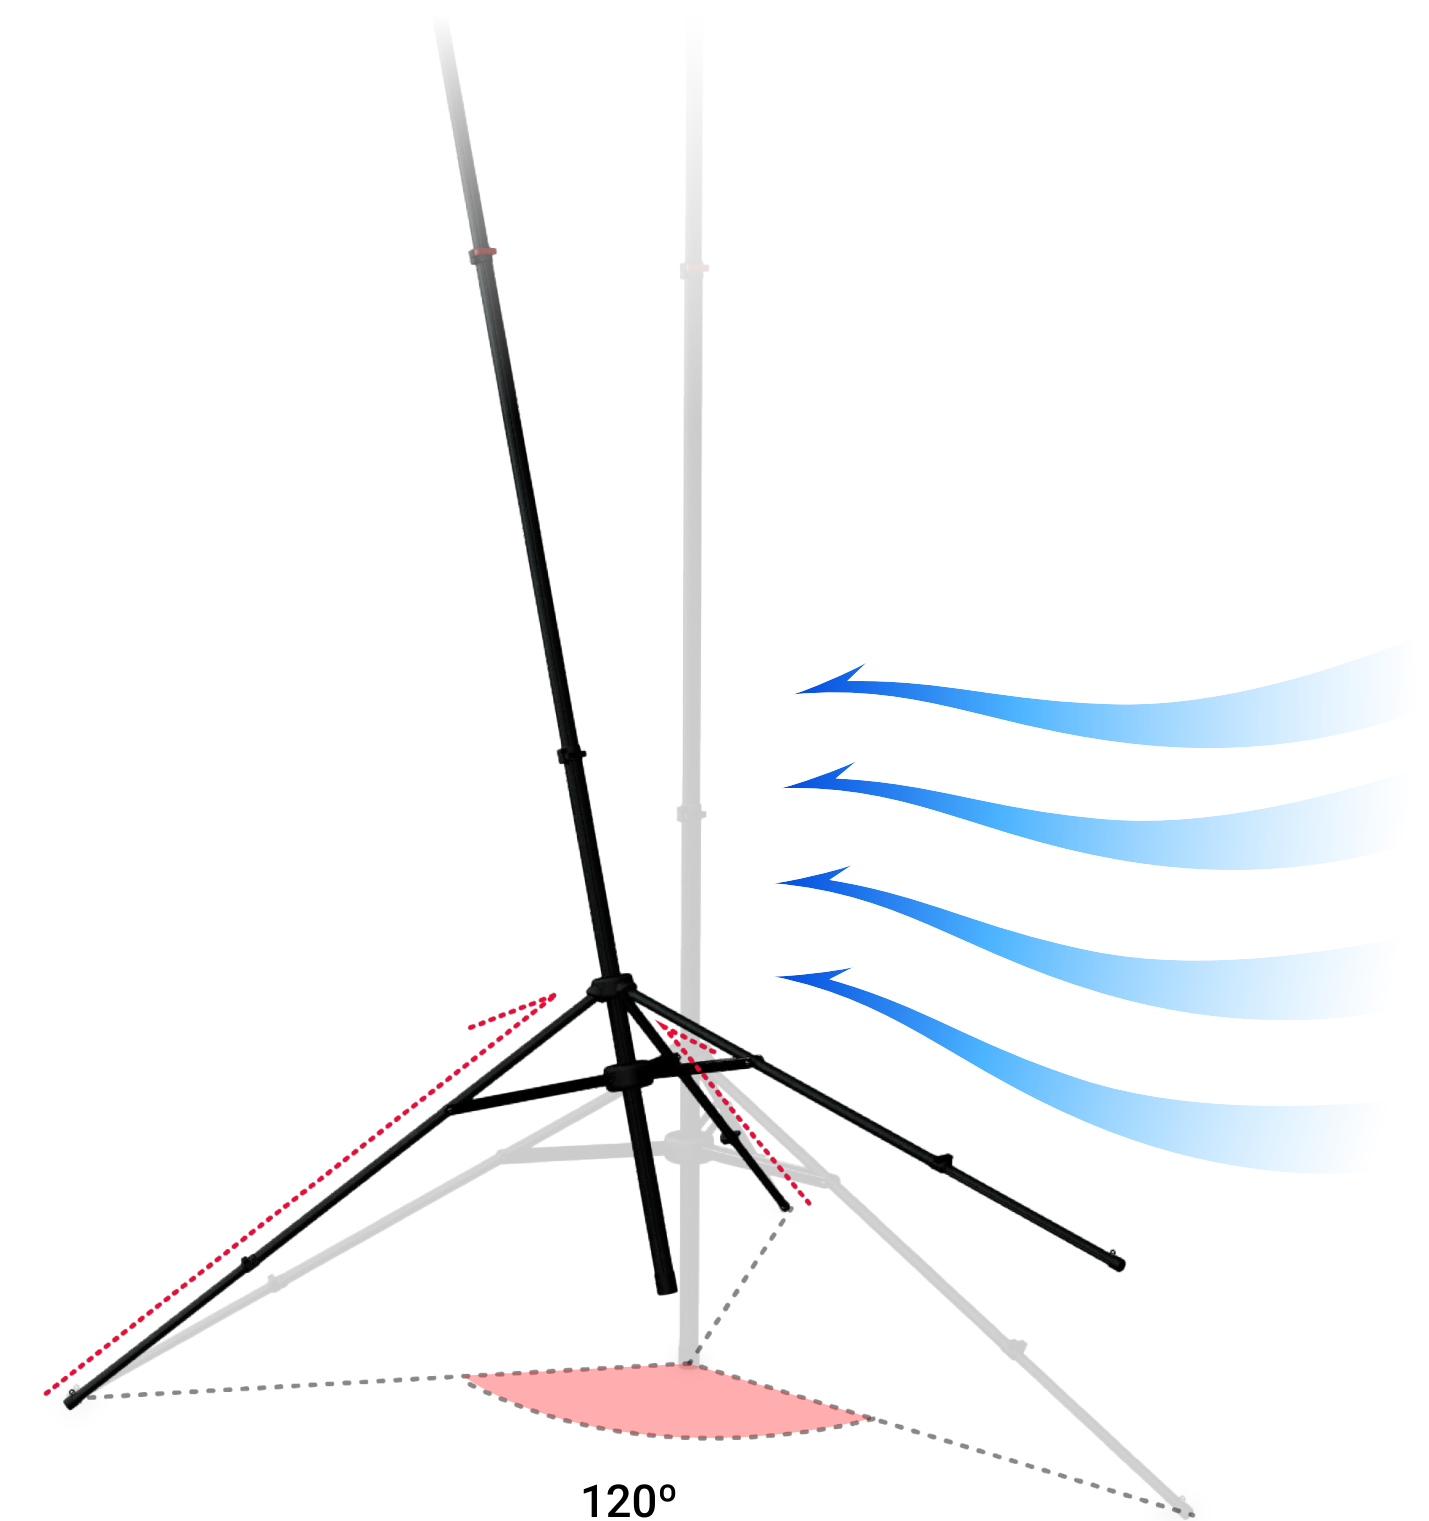

The four-legged design of the Bepro Quadpod reduces the angle between the legs from 120 degrees to 90 degrees, enhancing stability and balance.

Even if the stand loses balance due to strong winds or external forces, the four-legged structure holds the stand more securely.

The four legs of the Bepro Quadpod are extendable in two steps, providing additional stability by raising the center of gravity to a higher position.

Full-Length Unfold

The maximum height of the Bepro Quadpod is **7.6m** when fully extended. This height allows cameras to capture a bird's-eye view of the target area.

Fully extended
7.6m

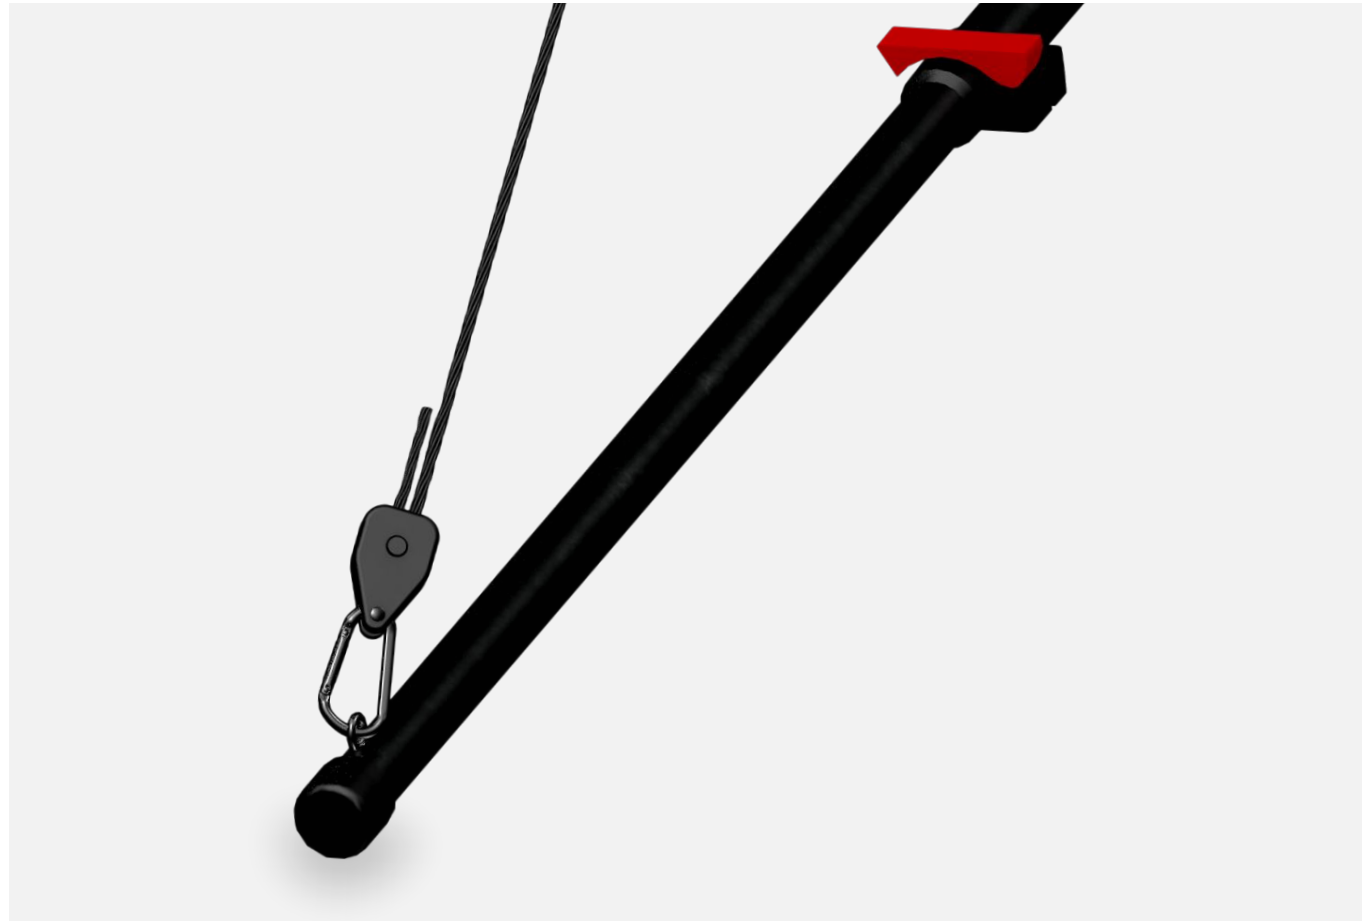

Stable But LIGHT

The Bepro Quadpod weighs only **6.5kg**
Constructed from aluminium,
it is lightweight yet strong and stable.

Its lightweight design makes it much easier
to carry while traveling.

	M's Tripod (7.7m)	Bepro Quadpod (7.6m)
Weight	12kg	6.5kg Light enough to lift with one hand

Prevent Shaking with Stabilisers

The diameters of the Bepro Quadpod's pipes ranges from 44.5φ to 25.5φ from the bottom to the top with 1T thickness. This diameters and thickness ensures the stand remains upright, preventing bending from wind or external forces.

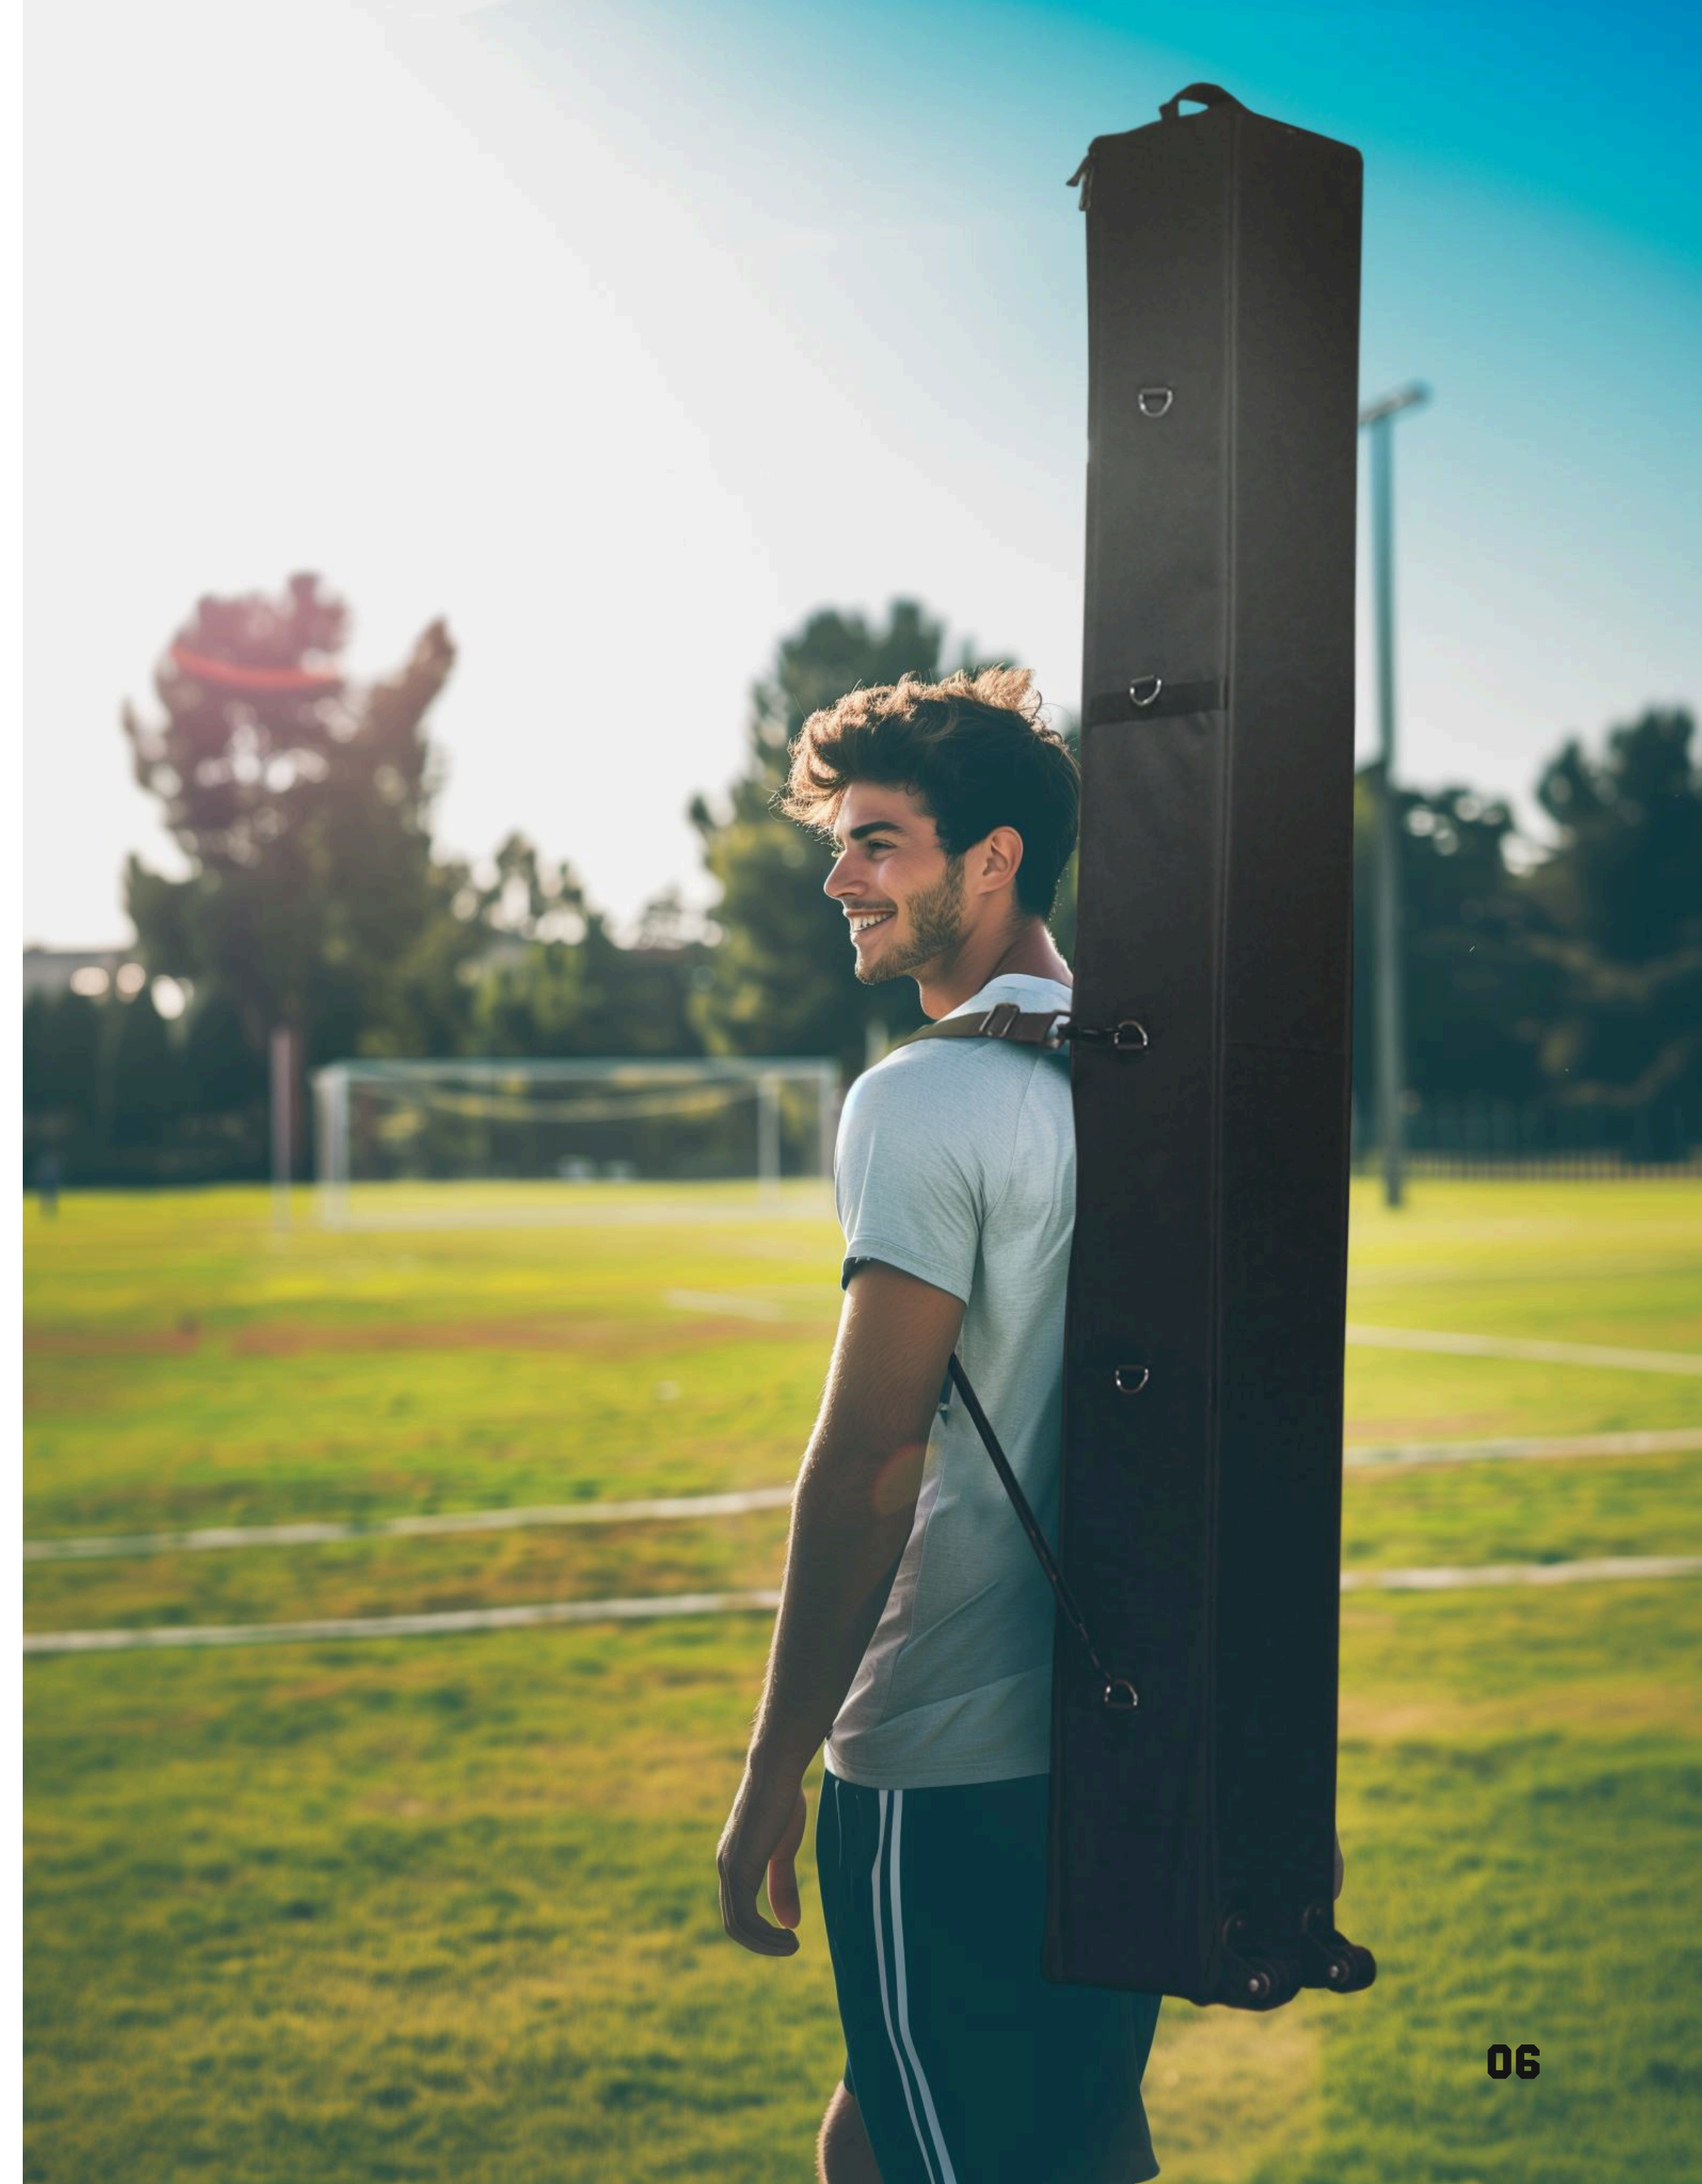

Hold Tight with Sandbags

Hooks on the legs of the Bepro Quadpod allow sandbags to be hung, adding extra weight to prevent tipping and enhance stability.

*Sandbags are not included

Easy to Carry with Carrier and Backpack Modes

The Bepro Quadpod comes with a versatile bag that can be used as a carrier, featuring a handle and wheels, or as a backpack with shoulder straps and back pads. This design offers additional mobility, allowing you to take the Bepro Quadpod wherever you go. Legs of the Bepro Quadpod allow sandbags to be hung, adding extra weight to prevent tipping and enhance stability.

Full Fold for Smoother Logistics

Full Fold for Smoother Logistics

When fully folded, the Bepro Quadpod has a height of only 172cm making it suitable for freight.

This compact size helps avoid extra shipping costs, keeping logistics economical.

Detail Specs

Quadpod

- Weight** 6.5kg
- Height** Full fold: 172cm / Full unfold: 7.6m
- Leg length** Full fold: 111cm / Full unfold: 153cm
- Height between the ground and the leg bracket** Legs fully extended Upper: 72cm / Lower: 51cm
Legs not extended Upper: 53cm / Lower: 32cm
- Full unfold leg angle** 63 degree

Bag

- Weight** 3.5kg (Including other accessories: 4kg)
- Size** 173cm x 19cm x 19cm
